Anti-Gravity Treadmill

New Anti-Gravity Treadmill

EXCITING NEWS!

Our PHOENIX Clinic has just added the newest version of the Alter G Anti-Gravity Treadmill. The first of this kind in Arizona!

Using NASA-developed Differential Air Pressure (DAP) technology, you can apply gentle lifting forces using air to unweight patients to as little as 20% of their body weight and precisely reduce the amount of impact on the body while walking or running.

This new and improved system comes with gait analytics measuring gravitational load and provides visual feedback on symmetry and impact on pain levels.

Call the Phoenix office to give this amazing technology a try (602) 956-4040
