Run Gait Analysis

We have been performing Run Gait analysis with high level and recreational runners for over 20 years!

Our run gait analysis is performed by one of our expert Physical Therapists, and provides the most comprehensive analysis of the runner available in the Valley.

This includes:

Run Gait Analysis

Review of injury and training history

Detailed physical examination of the athlete (posture, flexibility, strength, injury specific testing, functional and core testing)

Video Analysis of running gait using state of the art video technology

Review of run gait findings

Instruction in a specifically designed program to address inefficiency in running form, potential or current injury and to address footwear and orthotics.

Cost: \$275 includes Noraxon 3D motion and pressure analysis at Scottsdale location only.

Phoenix and Mesa Clinic cost; \$225 and includes video analysis and RunScribe analytics.

Time Commitment: 1 hour and 30 minutes to 2 hours.

What to bring: shorts, t-shirt, running shoes and orthotics.

Some of the questions that can be answered through run gait analysis are:

What is causing my pain with running?

Do I have a leg length discrepancy?

Do I have weak links in my body that affect running gait or my run volume?

Why do my calves cramp with running?

Am I running in the correct shoe?

Should I use orthotics or are my orthotics correct?

Should I try barefoot running?

Do I heel strike or forefoot strike?

Can I and should I change my run technique?

What specific stretches or exercises can I do to stay injury-free?

What can I do to run FASTER?!
